# 1 SAP Signavio Process Manager

SAP Signavio Process Manager is a cloud-based platform for modeling and analyzing business processes. The tool provides you with an ideal environment for working collaboratively on your processes.

Feature	Description
Process Modeling	Enables you to model and document business processes.
Shared Repository for Process Models	Enables you to manage models in one place.
Shared Dictionary	Reuse modeling elements across your organization by accessing and selecting them on the shared dictionary.
Custom Dictionary Categories	Create custom dictionary categories that match your specific business needs.
QuickModel	Create BPMN® 2.0 process models quickly and easily with the QuickModel feature.
Modeling Conventions	Perform modeling checks and customize process models.
Multi-language Support	Model processes in multiple languages.
File Management	Upload and manage files.
Access Rights Management and Security Settings	Manage access rights for different users groups and personalize security settings.
Customizable Modeling Convention	Verify process models and customize modeling conventions.
Attribute Visualization	Visualize attributes with icons and colors.
Customizable Process Documentation	Customize process documentation with templates.
Process Cost Analysis	Analyze process models for costs, resources checks, and improvements.
Process Reports	Create, save, and share reports in several different formats.
BPMN Simulation	Simulate modeling processes step-by-step.
Risk Management	Manage risks and controls in process landscape.
Approval Workflow	Set and manage approval workflows for process models.
Smart Folders	Use smart folders to save search results from search queries.
Decision Modeling	Model business decisions in DMN.
HTTP REST API	Model business decisions in DMN.
Connectivity	Provide connectivity and synchronization for business process data.

# Important Disclaimers and Legal Information

## Hyperlinks

Some links are classified by an icon and/or a mouseover text. These links provide additional information. About the icons:

- Links with the icon  : You are entering a Web site that is not hosted by SAP. By using such links, you agree (unless expressly stated otherwise in your agreements with SAP) to this:
  - The content of the linked-to site is not SAP documentation. You may not infer any product claims against SAP based on this information.
  - SAP does not agree or disagree with the content on the linked-to site, nor does SAP warrant the availability and correctness. SAP shall not be liable for any damages caused by the use of such content unless damages have been caused by SAP's gross negligence or willful misconduct.
- Links with the icon  : You are leaving the documentation for that particular SAP product or service and are entering an SAP-hosted Web site. By using such links, you agree that (unless expressly stated otherwise in your agreements with SAP) you may not infer any product claims against SAP based on this information.

## Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

## Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up. The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

## Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

## Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
